

Welcome to the first e-newsletter from TEMS International

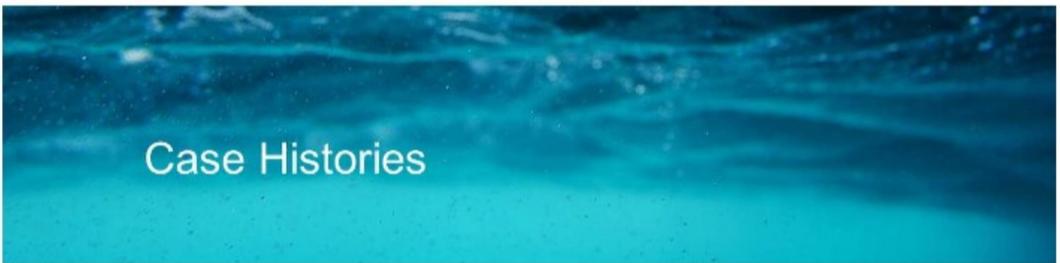

Recent contract awards

This year has provided many challenges for us all. However, the oil and gas industry has adapted, and E&P activity continues around the world. Over the last six months, our engineers have started providing [continuous environmental compliance](#) and [drilling performance management services](#) on two new projects one in the [Gulf of Mexico](#), and the other offshore [Trinidad and Tobago](#). This is the latest in a number of projects that we have supported in the GOM and Caribbean region, where protecting the environment is of particular importance. Follow the links to find out more on our [website](#).

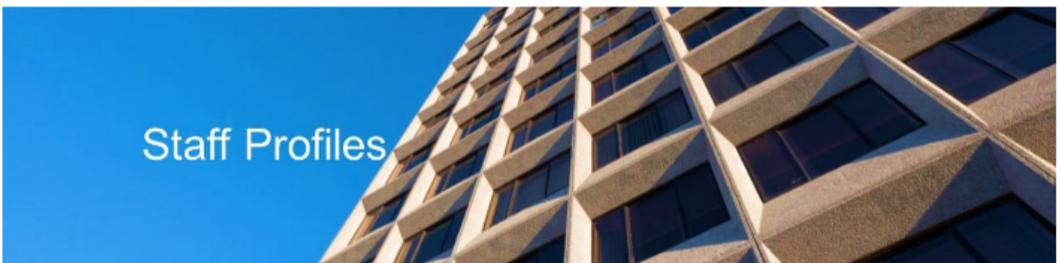

EAGLE Reports

In our quest to support oil and gas clients to optimise performance, improve efficiencies, reduce waste and lessen their environmental impact, we have developed bespoke well reporting software called EAGLE Reports. It is a cloud-based programme that uses automated algorithms to generate real-time data, improving reporting transparency and efficiency. Find out more on [our website](#).

Case histories

To illustrate how we support our clients and the benefits they gain from our independent services, we have started to produce case histories of recent projects. These demonstrate the significant cost savings and environmental benefit we can deliver. More case histories will be added to our website in the coming months, so please do visit the [case histories section](#) from time to time.

Staff news: Emy Marlina

We have a talented team of personnel at TEMS International and will be giving you the opportunity to meet more of them on our website and in future issues of this newsletter. A key member of the team is Dr Emy Marlina who works in our Kuala Lumpur office, supporting our growth in the Asia Pacific region. Emy has been working in the oil and gas sector for over a decade, but her interest in the sector was sparked at a young age.

Learn more about her experience in the oil and gas industry and her passion for travel at [our website](#).
